

From January 2019 to March 2019

LOVELY FELLOWSHIP EVENT - This was organised by our club at Villagio Templos in Zeytinlik.

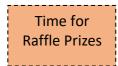

Rotary Fellowships consist of members who share a common interest in recreational activities, sports, hobbies, or professions. These groups help expand skills, foster vocational development, and enhance the Rotary experience by exploring interests while developing connections around the world.

İzmir Trip Handover Ceremony

As Rotary Club of Kyrenia Cosmopolitan, we attent Cyprus Membership Seminar on 23rd February 2019 at Chateau Status on Buffer Zone Nicosia.

The Rotary movement first began on 23rd February 1905, when a young lawyer, Paul Harris organized the first Rotary Club "in fellowship and friendship" with three clients and local businessmen. Harris Soon, realized that Rotary needed a greater purpose. This year Rotary International celebrated its 114th anniversary and as Rotary Club of Kyrenia Cosmopolitan, we attended this ceremony to celebrate. During the cermony three of our members were awarded with the Paul Harris Fellow award: Rotarian Behiye Müftüzade, Past President Gültaç Özsan and Aybars Kutluba it was a great honour for our Club to be recognised for its members achievements. Pelin Kutluba was also pinned at the ceremony and she has now become our newest member of Rotary Club of Kyrenia Cosmopolitan.

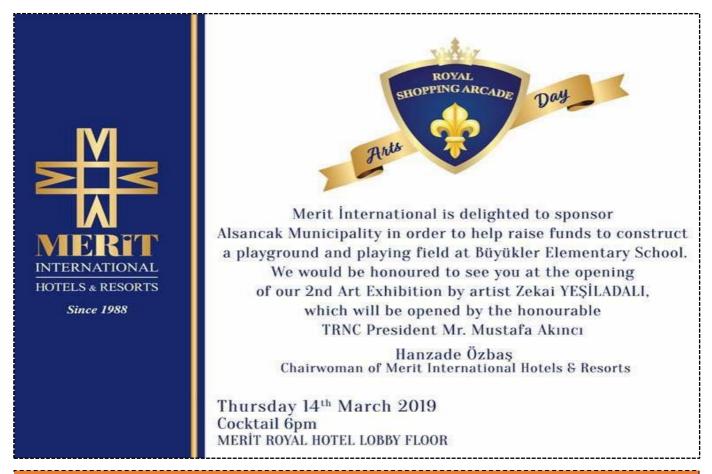

Our newest member, Pelin Kutluba

Our club members whom awarded with Paul Harris Fellow award

As Rotary Club of Kyrenia Cosmopolitan, we attent 2nd Art Exhibition by the artist Zekai Yesiladali at Merit Royal & Premium Hotel

Rotary Club of İzmir Varyant came and visited us.

Our TREE PLANTING Project

Since the beginning of life, trees have provided us with two of life's essentials, food and oxygen. As we evolved, they provided additional necessities such as shelter, medicine, and tools. Today, their value continues to increase and more benefits of trees are being discovered as their role expands to satisfy the needs created by our modern lifestyles. Also trees contribute to their environment by providing oxygen, improving air quality, climate, conserving water, preserving soil, and supporting wildlife. During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen that we breathe. From those reason as a club we decide to organise this project in 2018 as part of our strategic planning for the next five years. Today we are planting 8 Pepper, 8 Fire, 8 Jacaranda and 8 Australian Mulberry tree. On that date we have rotarians from our sister club RC Varyant from izmir, Turkey and also rotarian friend Işın Yaltıraklı come and join our ceremony. We would like to thank our main sponsor Merit International Group, General Manager of Merit Groups Aybars Kutluba, Alsancak Municipality Chair Fırat Ataser, Vice Chair Zehra Şekeroğlu, PP Gültaç Özsan, Pelin Kutluba and Rotarian friends Ayten and Ben Benoit for all contributions to organise this ceremony.

Our LATE BRUNCH after Tree Planting Ceremony with our rotarian friends and RC İzmir Varyant

Our guest speaker Dr. Nilufer Rahmeoglu Ramiz

About Project;

Cyprus is the third largest Mediterranean island with 300,000 Turkish Cypriot and 700,000 Greek Cypriot residents. Due to its political context, Northern Cyprus (home to Turkish Cypriots) has been relatively isolated from the rest of Europe for > 40 years. Consequently, there is a complete absence of population-level health data from this emerging region in Europe, and it is excluded from all health- statistics reported for Cyprus. COHERE Initiative is an on-going population-based, cross-sectional study targeting 10% of all women aged 18-55 (N=8000) living in Northern Cyprus. We aim to establish a women's health cohort to collect vital health and morbidity data, and investigate factors affecting women's health and care seeking patterns in the region.

Main objectives of the project;

- Understand distribution and prevalence rates of gynaecological conditions and associated symptomatology, and auto-immune, inflammatory, metabolic and pain comorbidity profiles.
- Investigate effect of reproductive and lifestyle factors on women's health.
- Map the geospatial distribution of identified conditions and investigate correlation with demographic and life-style factors.
- Investigate the genetic architecture of the population to understanding of disease-causing genetic risk factors in the region.

Historical Information About İzmir

Located in the west of Turkey and on the Aegean shores, izmir, the pearl of the Aegean, is the third largest city in Turkey. With its 8.500 yearhistory, fertile land, favorable climate, 629 km coastline, 300 sunny days a year, a sea that offers every shade of blue and the heritage left behind by the 32 civilizations it has been a home to, izmir is ready for you to discover. izmir owes its position as an economically and socially dynamic city to its location, climate and the fact that it has been a home to many different cultures and religions. Persians, Ancient Greeks, Assyrians, Romans, Byzantines and Ottomans are just a few of the dozens of different civilizations that the city has hosted throughout its long history.
